**Company:** CloudJunction Advisors

**Position:** Project Manager - SAAS

### **About the Organization:**

CloudJunction Advisors is a Salesforce Gold Partner, headquartered in Canada and Karachi and we are looking for driven talent in the role of “Project Manager” to join our growing team in Karachi.

### **Our Culture & Values:**

Our core values are Curiosity, Drive, Excellence & Professionalism. With an open, collaborative and teaching culture, we are a team of young, fun, challenging, and high achieving individuals with an environment that provides the opportunity to earn a competitive Base salary plus a Variable Bonus. ...

### **About The Role:**

The Project Manager oversees and drives implementation projects end-to-end on a variety of ‘Clouds’ and levels of complexity with a priority to ensure the project is successful – delivered on time, with a great customer experience, and within budget and an opportunity to work directly with our North American Clients to gain industry exposure, business acumen and develop yourself as a strong/world-class Project Manager.

- Work closely with different stakeholders Internal and External to coordinate project work across Clients and the internal implementation teams (management, subject matter experts, consultants, and developers) accordingly.
- Work closely with the Director of Service Delivery & Technical Leads and ensure the business requirements are accurately translated into technical requirements and the team has all the information required to progress the project
- Approval – ensure sign-off by the client of the different project phases (Design, Build, UAT, Deployment)
- Risk management – identify and mitigate risks or issues on a project, implementing strategies to minimize impact to the project, controlling deviations from the project schedule and costs
- Monitor & Report on the status of the project to internal management and the client management team, including escalating issues
- Build and maintain relationships with clients day-to-day, exceeding client expectations and ensuring satisfaction and support for clients throughout the project and post-project implementation process.

### **What We're Looking For:**

- **MUST HAVE - Flawless English language communications skills - Written and Spoken - You will be required to professionally and maturely communicate with our North American Customers.**
- You are an extrovert, analytical, assertive and opinionated person and can hold & defend your rightful business position and relevant point of view in a discussion.
- BS/MS in Computer Science, Software Engineering, or relevant disciplines.
- Experience of up to 1 year in Project Management or Courses / Training in the Area of Project Management is a huge plus!
- Knowledge of Java/ React Native/ Node.js/ SQL/ C#/ PHP or on similar platforms is a PLUS!
- We are looking for Curious People who are ready to learn and grow with our organization
- You will have a high degree of Drive to succeed in the technology industry and you are willing to put in the work to achieve this success

### **What we Offer:**

- Competitive Salary Structure with Monthly/ Quarterly Bonuses
- Quarterly Performance Review & Increments

- In-House Training and Certification Bonuses
- Direct exposure & collaboration with the C-Suite
- Monthly One-on-One Sessions with CXOs
- Monthly Team Events
- In-House Fitness Center
- And much more, If you think you can become part of a team that Heavily rewards High Achieving, Challenging, and Growing Minds, you should contact us!

**Application Deadline:** April 24th, 2022

**Job Type:** Full-time (Office Based)
